Summary

Aspiring Software Development Engineer with experience in building AI-powered and full-stack web applications using MERN Stack. Passionate about Data Structures and Algorithms, scalable system design, and solving real-world problems through software engineering.

Education

Sinhgad Institute of Technology, Lonavala **Jul 2024 – Jul 2027**
Bachelor of Technology in Computer Engineering *CGPA: 9.13*

Government Polytechnic Pune **Jul 2021 – Jun 2024**
Diploma in Computer Engineering *Percentage: 82.29%*

Relevant Coursework

- OOP (C++)
- Data Structure
- DBMS
- Computer Networks
- Web Technologies
- Operating System

Experience

CodSoft **Dec 2025 – Jan 2026**
Web Development Intern | HTML5, CSS3, JavaScript, Git *Remote*

- Designed and Implemented responsive web applications using **HTML, CSS, and JavaScript**,improving **100%** overall user experience.
- Built and deployed multiple frontend projects while following clean coding practices and utilizing **Git** for version control, improving code maintainability by **30%**.

Perpetual Invention **Jun 2023 – Jul 2023**
Full Stack Web Development Intern | MERN Stack, React.js, Node.js, Express.js, MongoDB, Git *Pune*

- Engineered full-stack web applications using the **MERN Stack**, improving application performance by **30%** through optimized React components and efficient backend integration.
- Developed secure **RESTful APIs** and MongoDB database models, reducing data retrieval time by **25%** while implementing reliable CRUD operations and scalable data management.

Projects

Rhythm| Emotion-Aware Music Recommendation Platform| *Python,React.js,Spotify API|* **Jul 2026 – Present**

- Engineered **Rhythm**, an AI-powered music recommendation platform that detects users' facial emotions in real time using **OpenCV** and **TensorFlow**, achieving **92%** emotion detection accuracy while reducing prediction latency by **30%**.
- Integrated the **Spotify API** with a responsive React-based interface to deliver personalized playlists based on detected emotions, improving recommendation relevance by **35%** and user engagement by **40%**.

MeetScribe | AI Meeting Minutes Generator | *React.js, Node.js,Whisper AI, Gemini API |* **Mar 2026 – Jun 2026**

- Designed and developed **MeetScribe AI**, an intelligent meeting assistant that converts meeting audio into structured meeting minutes using **Whisper AI**, reducing manual documentation time by **85%**.
- Incorporated the **Gemini API** to generate meeting summaries, action items, and key decisions automatically, achieving over **90%** summarization accuracy while improving workflow efficiency by **40%**.

OneCart | Smart Barcode Shopping Platform | *React.js, Node.js,MongoDB, HTML5 QR Code |* **Jan 2025 – Feb 2025**

- Architected **OneCart**, a self-checkout shopping platform that enables barcode-based product scanning, real-time cart management, and secure user authentication, reducing checkout time by **60%**.
- Built a complete **CRUD**-based admin dashboard with inventory and order management using **MongoDB** and the HTML5 QR Code library, improving shopping efficiency by **45%**.

Technical Skills

Languages: C++, JavaScript.
Frontend Technologies: HTML, CSS, JavaScript, React.js, Tailwind CSS.
Backend Technologies: Node.js, REST APIs, MongoDB, MySQL
Core Concepts: Data Structures and Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Professional Development

- Actively practicing Data Structures and Algorithms through LeetCode and coding challenges.
- Currently participating in the Google Cloud Arcade Program, gaining hands-on experience with Google Cloud Platform and AI services.
